Sapiens – a critical review - bethinking.org I much enjoyed Yuval Noah Harari's Sapiens: A Brief History of Humankind. It is a brilliant, thought-provoking odyssey through human history with its huge confident brush strokes painting enormous scenarios across time. It is massively engaging and continuously interesting.

### **Sapiens - a critical review - bethinking.org**

In writing Homo Deus Prof. Harari has done his best to rely on the most up to date sources and the most accurate facts available. Yet as with any human endeavor, mistakes are inevitable. Despite the best efforts of Prof. Harari and his editors, the text unfortunately contains some factual errors that were discovered only after the book was published, and it was too late to correct them.

About 70,000 years ago, Homo sapiens underwent a "cognitive revolution," Harari writes, which gave them the edge over their rivals to spread from East Africa across the planet. Other species had big brains too, but what made Homo sapiens so successful is that we are the only animals who are capable of large-scale cooperation.
